FEATURED HOME

This approximately 70 year-old English Tudor-style home in Upper Arlington was remodeled by R.J. Landis Design & Construction, Inc. to add a family room and a newly re-designed adjoining kitchen.

The new family room features many amenities such as large windows, a fireplace, entertainment center, nine-foot ceilings and crown molding. The exterior of the family room addition is expertly designed with stone and stucco to match the home's existing structure.

The kitchen, which contains many modern materials and conveniences, is stunning as well as functional. Cherry cabinets, hardwood floors, solid surface countertops and built-in appliances are some of the many features. A custom cherry hutch in the kitchen nicely completes this remodel.

For more information, call R.J. Landis Design & Construction, Inc. at 844-6400.
